

FOR 100+ YEARS A WINNING TEAM

Passion + Accountability as

Project Manager industrial lightweight buildings Hungary (m/f/d) - Remote

Herchenbach Industrial Buildings: Over 100 years of success, 150 Herchenbach employees currently working in five European countries, a sustainably growing and owner-managed medium-sized company. Thanks to our ongoing innovative strength, we are one of Europe's market leaders for modular storage solutions in lightweight construction. But we also inspire enthusiasm behind the scenes. Our modern and open corporate culture is not only reflected in an excellent rating on Kununu, but has also earned us the independent award as "Top Employer in the SME Sector" for the 10th time in a row!

Become part of the WINNINGTEAM+ as a Project Manager industrial lightweight buildings (m/f/d) with a focus on projects in Hungary.

Following your structured onboarding process and individual training, you will be responsible for organizing and managing the timely, cost-effective, and flawless implementation of our lightweight hall projects and supporting our customers throughout Europe from our headquarters in Hennef.

Thanks to your strong organizational skills, as a project manager you will never lose track of multiple parallel projects and will always keep your projects on budget and on time. As the linchpin at the center of our operational project business, you will act as a strong communicator, mediator, and de-escalation point between external and international (customers/builders, building authorities, service providers, and suppliers) and internal (supply chain management, sales, technology, and assembly) project partners. You will spend most of your working time in remote in Hungary. Project-related site visits within Hungary will be made as required and will account for an average of 30% of your working time.

Your Tasks

- You will be responsible for the commercial, technical, and organizational management of the timely, cost-effective, and flawless implementation of our international lightweight construction hall projects.
- You will coordinate both internal (sales, supply chain management, planning, scheduling) and external interfaces (especially builders and subcontractors) and reliably ensure that all external and internal project participants receive all necessary information and preparatory work in a timely manner.
- Based on the hall configurations that you receive from sales at the start of the project, you will create parts lists for components and materials from our modular system and define capacity requirements for personnel, tools, and services. In the event of obstacles and conflicts during the project, you will act as a strong communicator, mediator, and de-escalation point.
- You will spend most of your working time at our company remote, if necessary, you will visit project-related construction sites in Hungary (30% maximum).

Your Profile

- Successfully completed training or a degree, ideally with a technical or construction-related focus (e.g., industrial engineer, civil engineer, mechanical engineer, architect, construction technician, architectural draftsman, technical draftsman, technical system planner, construction manager, technical business economist, industrial clerk, metalworker, or carpenter with further training as a technician or master craftsman (*gn)).
- Alternatively, you can also convince us if you have no formal training in this field but have relevant professional experience in technical project management (e.g., in trade fair construction, stage construction, event construction, facade construction, scaffolding, metal construction, plant construction, mast construction, wind power, solar systems, etc.).
- Practical experience in the areas of project management, project control, project execution, project leadership, construction management, work preparation, production planning, production control, order center, order processing, or similar areas.
- Fluent English and hungarian language skills at least at a speaking level B2/C1.
- Organizational skills, strong implementation skills, and very good communication skills. Confident use of MS Office; experience with an ERP system is an advantage but not essential.
- Willingness to travel sporadically within the country and, if necessary, within Europe for project-related purposes (max. 30%).

Benefits

- Permanent position with 30 days of annual leave in a crisis-proof industry.
Excellent working environment (Kununu TOP Company / Focus Top Employer in the SME sector).
- Equipment for your remote workplace and a company car.
- Structured onboarding & individual training.
- Quick assumption of responsibility.
- Regular development opportunities, seminars & training courses (in-house & external).

What do we build on? Our values! And maybe soon on you.

Respect: You treat colleagues, partners, and customers with respect, because good cooperation on the construction site and in the office begins with mutual appreciation.

Results: You work in a solution-oriented and efficient manner to bring high-quality projects to fruition.

Responsibility: You take responsibility for your tasks and decisions—reliability and safety awareness are your top priorities.

Relentless: You persevere even when faced with complex challenges and persistently seek the best solution.

Do you think in terms of solutions rather than problems and want to make a real difference? Then our recruiter **Vicky Dimitriadou** looks forward to receiving your application! Please include a few sentences about your motivation, your salary expectations, and your earliest possible start date. Let's see if we can build something really strong together—during an initial digital meeting.
